

Academic Plan - Excellence in Teaching and Learning

Student Employment - 2008 Update

Employing students on campus keeps them engaged, and there is evidence to show that this helps retention. This message has been conveyed to faculty, staff and students. The opening of the Campus Center has resulted in about 300 part-time student jobs. In addition, there are other opportunities for student employment, many of which engage students more deeply in their learning, such as student-assisted instruction and peer-led team learning.
