17. **Justification for Change**

We wish to increase the number of credit hours for Q640: Special Topics in Human Genetics · Embryology from one to two hours given that the complexity of the information to ideally be covered requires more than one hour per week of class time. Until 2004, this course was taught by a different professor in the fall semester of even years. In 2008, the class was reorganized and re-introduced under the instructorship of Dr. Laurence Walsh, who both expanded on the level of detail covered and enhanced the direct application of the material to genetic disorders and malformations being studied by the genetic counseling students. He found that many of the class sessions in fall semester 2008 ran over the allotted one-hour class time. He was forced to cut short some of the information he would have liked to have taught. Therefore, an increase to two credit hours will allow time for the incorporation of all pertinent information to be covered.
