16. Current course description: This course examines the benefits and dangers of over-the-counter drugs. Students will study the basic pharmacodynamics of drugs, how drugs work in the body, and how drugs can benefit or harm the body. Students will learn about the drug approval process, the pros and cons of the process, how drugs can be removed from the market, and dangers associated with prescription and over-the-counter drugs. Students will study the basic pharmacodynamics of drugs, the drug approval process, the pros and cons of the process, how drugs can be removed from the market, and additional dangers associated with prescription, over-the-counter drugs, and the use of natural supplements and herbs.

17. Justification for change: Additional information on prescription drugs as necessary

18. Are the necessary reading materials currently available in the appropriate library? Yes ___

19. A copy of every new course proposal must be submitted to departments, schools, or divisions in which there may be overlap of this course with existing courses or areas of strong concern, with instructions that they send comments directly to the originating Curriculum Committee. Please append a list of departments, schools, or divisions thus consulted.

Submitted by: ___________________________ Date: 5-21-06

Department Chairman/Division Director

Dean of Graduate School (when required)
