RESPECT Center Co-Director Dr. Joan Haase is internationally recognized for her research on ways children, adolescents, young adults, and families positively adjust to the experience of cancer and other chronic illnesses/ Her Adolescent Resilience Model (ARM) guides descriptive and intervention research to improve symptoms and psychosocial adjustment for adolescents and young adults with cancer. The ARM is currently being used in a multi-site study to evaluate a music therapy intervention for adolescents/young adults undergoing stem cell transplant with Co-Principal Investigator and RESPECT Center Core Faculty Sheri Robb, PhD.
