Agenda Item X: [Information Item] Report on Recent Tuberculosis Case

Spratt reported on a student that was diagnosed with an active TB case and treated at the hospital. MCHD informed campus and they worked with MCHD to develop a list of those with close contact to the student. Spratt discussed the two types of TB – latent and active – and the methods of spreading TB (airborne only and in close contact with an infected person). Can be treated with antibiotics. People on the list of having close contact with the infected student were contacted directly and provided instructions on how to be screened, tested, and treated if necessary. Clinics were set up for this group. No positive results came from those tests. The student has been released from the hospital and is doing much better. The case will be followed for three months per HD guidelines.

Question was raised on how campus determines when to notify campus of cases of diseases and still be in compliance with HIPAA laws, privacy concerns, etc. Spratt said each case has to be evaluated individually. The cases of mumps was brought up. There have been cases at Butler and IU Bloomington. Recommendation by MCHD is to be current on MMR vaccines and use the same hygiene habits as protecting from the flu. Question was asked about requirement of shot records.
