

Post-Doctoral Research Position

The Department of Surgery, Indiana University School of Medicine is seeking an applicant for a Post-Doctoral position in a research laboratory focusing on adult and umbilical cord stem cell biology. It will be a unique opportunity for the scientist to work in collaboration with a clinician in developing a laboratory focusing in the role of endogenous progenitor cell populations in the development of cardiovascular diseases and in developing novel cell therapies for cardiovascular and neurological diseases.

PhD candidates should be motivated individuals, committed to biomedical research, with experience in laboratory methods of flow cytometry, colony forming assays, RT-PCR, ELISA, and genetic engineering. Please send a current curriculum vitae and contact information to:

Michael P. Murphy, M.D.
Department of Surgery, Section of Vascular Surgery
1001 West 10th Street, WD-OPE 303
Indianapolis, Indiana 46202
